## ABOUT

Cinematographer drawn to stories that transform the ordinary into the unforgettable. I aim for visual impact and emotional response in my work: lighting that elevates the frame and commands attention, color driven by tone and mood, and camera movement that invites the viewer into the scene.

My journey through the camera department — utility, loader, camera assistant, operator, and now DP — has grounded me in the day-to-day craft of filmmaking. I've learned how to move through sets quietly, respect performance, and build trust through clarity, communication, and consistency.

Since joining Local 600 in 2019, and becoming a DP mentee in 2025, I've contributed to features, episodic work, long-form documentaries, and commercial content. I'm comfortable building looks from set through color pipelines, navigating multi-camera workflows, and adapting to whatever the shoot demands. My goal is always the same: to serve the director's vision while creating an exceptional visual journey.
